

Looking for an easier way to give individual cow's milk the **green light**?

Try the NEW

Delvotest[®] SP - NT
Antibiotic Residue Test

The perfect companion for your Delvotest[®] P/SP testing program

The broad spectrum accuracy and reliability you trust with Delvotest® is now available in a convenient new test kit perfect for screening individual cows.

Introducing Delvotest® SP - NT

EASY...“NT” MEANS NO TABLET

No tablet required, just add milk to the ampoule. Fast test preparation saves you time while reducing potential for errors.

EFFICIENT - Longer kit shelf life (now 12 months) saves you money. Plus, it works with the MCI-12 incubator

ACCURATE - This new test kit delivers the same sensitivity, reliability and security you expect from Delvotest®. Its broad-spectrum performance includes the detection

of a wide range of commonly used antibiotics including Pirsue® and tetracyclines.

THE PERFECT COMPANION TEST

You've long trusted the FDA approved Delvotest® P/SP for testing your milk before distribution. By adding Delvotest® SP - NT to your antibiotic residue testing arsenal, you can efficiently ensure that individual cow's milk is safe before adding to your bulk tank.

This test is not intended for NCIMS use.
