DAIRY SANITATION PROGRAM PRODUCT OVERVIEW

CIP CLEANERS (cont.)

Score II – Powdered Chlorinated Alkaline CIP cleaner designed to handle tough soil conditions.

HIGH ALKALINE

Achieve Plus – Liquid high alkaline detergent which works well in all types of water.

ACID

Acid Rinse – Concentrated, non-foaming acid cleaner for use in acid washes and rinses. This has a blend of acids and surfactants to quickly penetrate soils.

Hi Clean – Concentrated, low phosphate, non-foaming acid cleaner for use in acid rinse and wash applications.

GENERAL CLEANERS

Sparkle – Concentrated neutral detergent and foam additive ideal for washing utensils and painted surfaces. Sparkle can be used as a foam builder with either Alkaline or Acid products.

Team Chlor – Powdered Chlorinated general cleaner. It provides superior cleaning power for penetrating and quickly removing fat and protein food soils.

Parlor Shine – High foaming, Chlorinated Alkaline detergent that produces a thick, long lasting stable foam. This product is for removal of all organic soils.

Parlor Brite – High foaming Acid detergent that produces a thick, stable foam for the removal of mineral films.

Power Off – Concentrated, low foaming liquid degreaser and cleaner. Easily penetrates and removes fats, oils, grease and petroleum oils. This product has been proven to effectively remove ORBASEAL. Power Off can be added to other Alkaline solutions.

D-Solv #501 – Concentrated high foaming degreaser that penetrates soils rapidly and can be used to clean painted equipment if used at recommended concentration.

DAIRY SANITATION PROGRAM PRODUCT OVERVIEW

SANITIZERS

Pro Chlor 125 – Concentrated 12.5% Chlorine sanitizer. It is very cost effective when compared to competitive products of lower concentration.

Final II – An acid sanitizer that can be used at a rate of 1-2 oz. per 10 gallons of water for 200-400 ppm. Final II can also be used as a self-foaming acid cleaner.

LAUNDRY

Blue Laundry – Powdered laundry detergent containing optical brighteners to keep colors and whites looking bright.

Liquid Laundry – Concentrated liquid laundry detergent containing optical brighteners to keep colors and whites looking bright.

MISCELLANEOUS PRODUCTS

Pro PrepsTM – Iodine or chlorhexidine impregnated towelets for use as a pre-milking teat preparation. The high quality 8” x 10” paper has been specially selected to hold together for tougher cleaning of cows.

Hydrogen Peroxide

Propylene Glycol

NZP Drum Pumps
