

SKY HIGH ENERGY

ELECTROLYTE* VITAMIN AND DIETARY FIBER NUTRIENT

Sky High Energy is a non-medicated oral fluid replacement therapy designed to correct dehydration, acidosis, and electrolyte losses that accompany bacterial, viral or nutritional scours in young calves.

Sky High Energy also contains a readily available energy source and high levels of essential vitamins to help combat the stresses associated with scours.

Leave Calf Scours Behind A Better Choice for Calf Dehydration Therapy

- **Electrolytes**
- **Vitamins**
- **Energy**
- **Palatable**
- **Extended Time Release**
- **Non-Medicated**
- **No Withdrawal**

*Psyllium Husk forms a gel when mixed as directed with water.

*This gel reduces the volume of fluids which by-pass the primary route of absorption and are flushed into the large intestine providing a medium for growth of pathogens.

*More nutrients are therefore available for absorption and re-hydration success.

*The benefits possessed by Sky High Energy replaces ordinary electrolytes and makes it a valuable choice to prevent calf mortality due to dehydration.

WHAT IT IS:

Sky High Energy is a non-medicated oral source of elements that are often depleted when dehydration occurs. **Sky High Energy** also contains elevated levels of ingredients high in energy as well as vitamins which are commonly deficient. The most unique feature of **Sky High Energy** is the gel forming component. A rare vegetable fiber is used to absorb water when mixed as directed. This combination, when used properly, is very effective in reducing electrolyte losses leading to dehydration and acidosis.

WHAT IT DOES:

When mixed with water, the vegetable fiber forms a gel which absorbs the electrolytes, vitamins and glucose. This gel retains these valuable nutrients and provides a steady supply of these nutrients to the calf. Understandably, this steady supply greatly enhances the value of nutrients, making them available for a longer period of time. The secondary benefit of a gel is the reduction of the volume of fluids which by-pass the route of absorption (the small intestine) and are flushed into the large intestine providing a medium for growth of harmful pathogens.

Ingredients: Dextrose, Psyllium Husk Powder, Sodium Bicarbonate, Sodium Chloride, Vegetable Gum, Sodium Citrate Dihydrate, Potassium Chloride, Magnesium Sulfate, Niacinamide, Vitamin E, d-Calcium Panthenate, Pyridoxine HCl, Thiamine Mono, Riboflavin, Folic Acid, Vitamin K3, Vitamin A, Biotin, Vitamin B12, Vitamin D3, Citric Acid as preservative and Silicon Dioxide as anticaking agent.

Units of Sale:

- Case of 72 (105 gram packets)
- Pail (5 lbs.) (4 pails/box)
- 25 lb. bag
- 50 lb. bag
